Re: C & D Recycling Site  
Tonolli Corporation Site

Dear John:

Enclosed for your reference are several documents which should update you on EPA's involvement with the two sites referenced above. The data package for residential well sampling conducted at C & D, and the accompanying toxicological assessment are provided for your records. As you can see from this material, it appears that there may be a problem with Mrs. Sulima's well. If you have any thoughts on this, or would like to discuss the data, please feel free to call. Otherwise, I will be in touch as soon as the data packages from the initial RI work are delivered. We will need to meet, with relatively short notice, in order to review the data provided pertaining to the selection of intervals to screen in the new on-site monitor wells.

I have enclosed the PRP list and a copy of the notice letter sent to the 355 parties involved with the Tonolli Site. As discussed over the phone, our next action will involve the October 18 meeting (1:00pm., Green Building, 6th & Arch Sts., Phila.) with the parties who are willing to attend. I will contact you prior to this meeting if we plan to visit the Tonolli site, or if we need a pre-meeting for this gathering of PRPs.

Please feel free to call if you have any questions, or need copies of the site work plan documents (C&D). Also, I will be in touch regarding a potential citizen's group meeting at C & D.

Sincerely,

*Donna M. McCartney*
